

# CRYOVAC SES FILM

Outstanding presentation. Leakproof sealing.  
Optimised production.

## HIGH CONSUMER APPEAL

- **Excellent presentation:** Superb transparency and sparkle. Intimate contact with contents permits product to “sell itself”.
- **Outstanding memory:** SES stays skin-tight throughout distribution chain, even for higher profile products.
- **Quality look:** The familiar, store-wrapped look that customers prefer, but neater appearance. Loose, messy packs become a thing of the past.
- **Merchandising appeal:** Trayed product can be printed on top, bottom and sides of package.

## HIGH PACK INTEGRITY, HYGIENIC

- **Leakproof seal:** Thin but strong hermetic seal prevents leakers and eliminates cross-contamination.
- **Tamper-evident:** Safety and security of package are visually obvious.

- **Abuse resistant:** Tough SES film protects contents by minimising tears and punctures. Reduces waste.
- **Traceability:** Supply sources can be pinpointed, thanks to Case-Ready system.

## COST-EFFECTIVE PRODUCTION

- **Higher pack density:** No headspace needed, permitting use of lower profile trays.
- **Simple, flexible production:** Wide choice of tray types and formats, with quick changeovers.
- **Respects the environment:** Pure polyolefin SES is non-corrosive, emits no harmful fumes. Requires less film per package than with traditional stretch overwrap.
- **Printability:** Can eliminate cardboard sleeves, bands and labels requiring additional manufacturing steps.

# CRYOVAC\* SES – TECHNICAL INFORMATION

Thin stretch-shrink film with excellent optics for overwrapped format utilizing a variety of low-profile trays.

## Film

Cryovac SES is a thin, multi-layer, polyolefin, fully coextruded stretch-shrink film, permitting skin tight presentation throughout distribution.

## Equipment

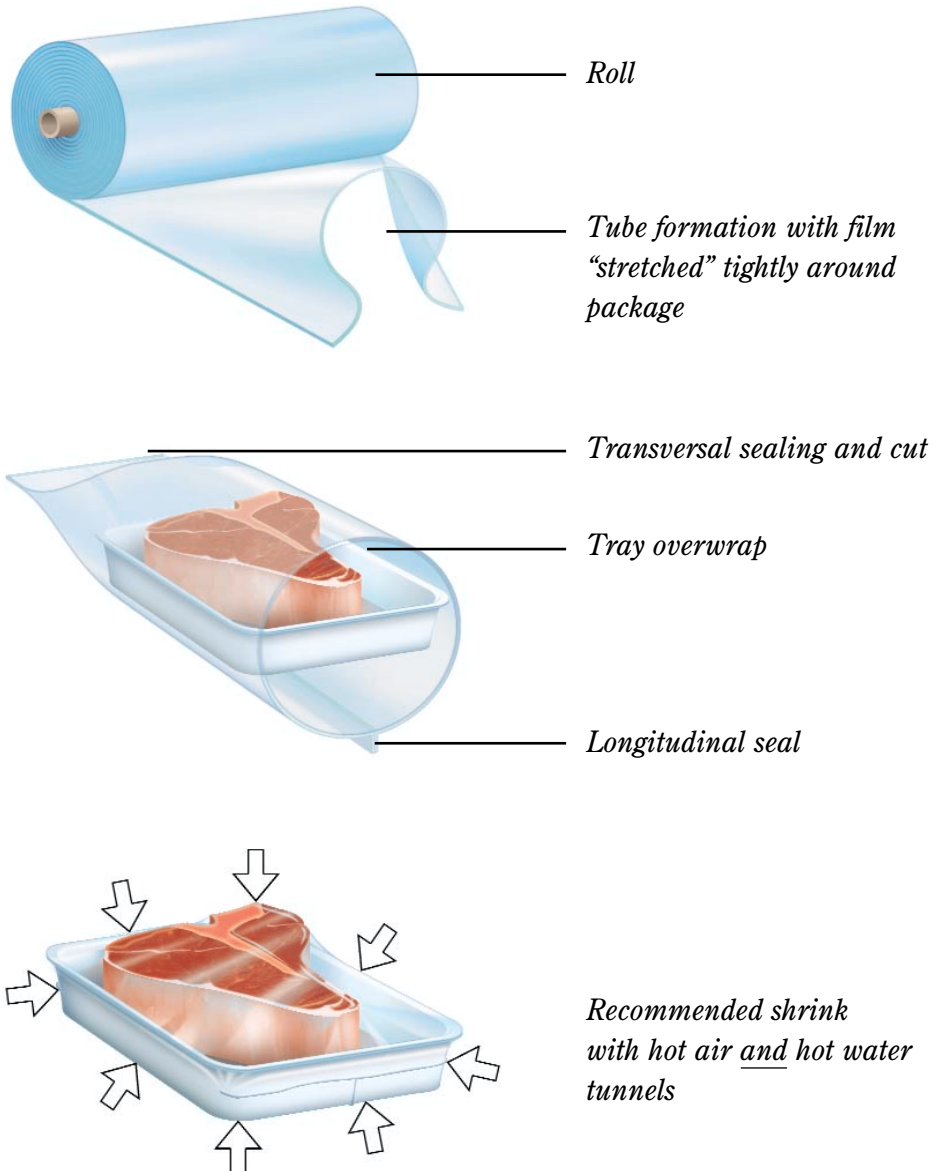

Qualified horizontal form fill seal machines with pre-stretch capabilities and shrink tunnels.

## Trays

Polystyrene, cardboard or rigid trays in a broad range of sizes and colours.

## Applications

Full range of fresh meats with up to 5 days shelf-life.

Your local CRYOVAC representative will gladly give you full information
