

# Xenith<sup>3</sup><sup>TM</sup>

**Strength,**

**Optics,**

**Soft/Low  
Temperature shrink,**

**And Easy Sealing**

**Wrapped**

**Into One**

**Shrink Film**

## **Strength**

**Xenith<sup>3</sup> is the strongest soft shrink film available**

Finally your easily-distorted products can get a level of protection previously available only in high-shrink-force films.

## **Soft Shrink**

**Xenith<sup>3</sup> exerts low shrink force against your product**

With its low shrink tension, Xenith<sup>3</sup> will not bend or crush your delicate products.

## **Low Temperature Shrink**

**Xenith<sup>3</sup> shrinks at significantly lower temperatures**

You can now wrap your heat-sensitive products with less worry. Lower shrink temperatures also means lower utility bills.

## **Wide Operating Window**

**Xenith<sup>3</sup> performs well in variable operating conditions**

A wide shrink range makes it easier to get perfect results, even with less-than-perfect equipment.

## **High Free Shrink**

**Xenith<sup>3</sup> has a very high percentage of "Free Shrink"**

Anyone can wrap a box, but Xenith<sup>3</sup> conforms to products like a second skin, including contoured and irregular-shaped products.

## **Easy, Strong Sealing**

**Xenith<sup>3</sup> seals easy and strong at all speeds**

Xenith<sup>3</sup> is a cross-linked film with a wide sealing window capable of handling a broad range of wire, knife, band, static or thermal seal mechanisms.

## **Optics**

**Xenith<sup>3</sup> is crystal clear with a high-gloss finish**

Shelf presentation that grabs the consumer's attention. The clarity and gloss enhance a product's shelf appearance.
